Toolkit for Adagio - Release Notes

Version 9.3.32.224 (9.3C), April 28th, 2025

o Added a function to change or combine SalesCQ prospects

o Added support for the following new release:

   Adagio Inventory 9.3B (2025.03.10)

o Fixed an issue with automated Toolkit posts. A backup was created regardless of whether there were pending changes. This applies to all code changers.

Version 9.3.29.218 (9.3B SP8), November 30th, 2024

o Fixed issues with changing PO Sundry Items. A table error might have appeared when the form was open. Single segment items may have failed to change.

Version 9.3.28.217 (9.3B SP8), June 3rd, 2024

o Added support for the following new release:

   Adagio JobCost 9.3A (2024.04.29)

o Fixed an issue with the detailed audit report. Formatted I/C items that exceeded 16 characters would have been truncated. In that instance, an unformatted item will be written to the audit trail.

o The I/C unit changer units will not be deleted, if you are posting for a range of items.

Version 9.3.26.210 (9.3B SP7), November 7th, 2023

o Fixed an issue with registration. There was an unnecessary prompt for data registration when the Toolkit was just registered.

o Fixed issues with the A/P Vendor Changer. The vendor's short name was unaffected. Combining a vendor should not affect the active status.

o Fixed an issue with the Recalculate Inventory Sales History. The item sales amount stats were negative.

Version 9.3.26.207 (9.3B SP7), July 7th, 2023

o Added support for the following new release:

   Adagio SalesAnalysis 9.3B (2023.06.16)

o Fixed and enhanced the PO Document Format Changer.

o Added a function to change the Bill of Material number.

o Added the ability to edit the project code on a posted G/L transaction.

Version 9.3.22.203 (9.3B SP6), February 16th, 2023

o Fixed issues with the Inventory Item Changer. Combining items could have resulted in a correctable file integrity error. Combining items could also generate application errors with Bill of Materials and item cross referencing.

o Fixed an issue with the Edit GL Posted Transaction function. Entries could be posted incorrectly, if the user first chooses an alternate batch.

Version 9.3.21.201 (9.3B SP6), January 24th, 2023

o Added support for the following new release:

   Adagio OrderEntry 9.3B (2022.12.07)

o Fixed an issue with the Unit of Measure changer. One of the unit fields on the quote detail was not being changed.

Version 9.3.20.200 (9.3B SP5), July 11th, 2022

o Added support for the following new release:

   Adagio Receivables 9.3B (2022.07.08)

o Added PO reference to one of the fields you can edit for posted AR transactions.

Version 9.3.19.198 (9.3B SP4), April 6th, 2022

o Added support for the following new release:

   Adagio SalesCQ 9.3A (2022.04.06)

o Fixed an issue with the customer changer. Combining customers could have resulted in missing shipto records.
o Fixed an issue with the shipto changer. An error regarding a missing data file could have halted the process.
o Fixed an issue with changing items in the barcode file.

Version 9.3.18.197 (9.3B SP3), January 15th, 2022

o Added support for the following new release:

   Adagio PurchaseOrders 9.3B (2022.01.13)

Version 9.3.16.195 (9.3B SP2), October 12th, 2021

o Added support for the following new release:

   Adagio Invoices 9.3B (2021.09.30)

o Added two new functions to change Adagio Ledger project codes and format.

Version 9.3.15.194 (9.3B SP1), July 6th, 2021

o Added support for the following new release:

   Adagio Payables 9.3C (2021.07.06)

Version 9.3.12.192 (9.3B), March 18th, 2021

o Fixed an issue with the T/B Docket Transfer function. The target customer cannot already have that docket.

Version 9.3.11.191 (9.3B), March 11th, 2021

o Fixed an issue with the registration of newly added functions

Version 9.3.10.189 (9.3B), February 8th, 2021

o Added support for the following new release:

   Adagio Ledger 9.3B (2021.01.15)

o Added two new functions for Adagio Time & Billing. You can reassign the customer/docket or
   change the assignment of an invoice.

o Added the ability to change tax groups for Order Entry, Inventory, Purchase Orders, Invoices and Time Billing.

o Fixed an issue with changing inventory items. An error might have appeared for IC93A and dayend records.

Version 9.3.9.186 (9.3A SP9), October 20th, 2020

o Added support for the following new release:

   Adagio BankRec 9.3A (2020.09.29)

o Added the rebuild of BankRec reconciliation filters when banks are changed.

o Added ability to edit the 2nd description on a posted vendor transaction.

o Updated supporting DLLs.

o Fixed an issue with opening the AP Control account file for AP93A and AP92B. This error could appear while importing unrelated changes or while using the AP control account changer. There was no impact to the import.

o Fixed an issue with making changes within DocStore.

Version 9.3.8.185 (9.3A SP8), February 17th, 2020

o Added support for the following new release:

   Adagio Payables 9.3B (2020.02.17)

o Fixed an issue with combining G/L Accounts with cross-referencing enabled, resulting in repairable data integrity errors.

Version 9.3.7.183 (9.3A SP7), December 16th, 2019

o Added support for the following new releases:

   Adagio Inventory 9.3A (2019.10.23)
   Rentals for Adagio 9.3A (2019.09.02)
   ePortal for Adagio 9.2B (2019.09.02)

o Removed the ability to change prior year G/L posted transactions.

o Fixed an issue with O/E Standalone changes, imports and exports.

Version 9.3.6.178 (9.3A SP6), April 15th, 2019

o Fixed an issue with changing fields on Adagio Invoice lines.

o Added support for the following new release:

   Adagio SalesAnalysis 9.3A (2019.04.24)

o Confirmed support for the following new service packs:

   Adagio Receivables 9.3A (2019.03.27)
   Adagio Invoices 9.3A (2019.03.18)
   Adagio OrderEntry 9.3A (2019.04.08)

Version 9.3.5.176 (9.3A SP5), December 17th, 2018

o Added support for the following new release:
   Adagio BankRec 9.2A (2018.12.16)

o Fixed an issue with combining customers or vendors with duplicate documents.

Version 9.3.4.175 (9.3A SP4), September 24th, 2018

o Added support for the following new releases:

   Adagio FX 9.3A (2018.09.12)
   Adagio DataCare 9.3A (2018.10.30)

o Fixed an issue with the home currency changer. Data integrity errors could arise with a multicurrency Ledger and the target currency in use.

o Fixed an issue with G/L Filter Matches. The optional index was not updated after changing accounts or departments. The G/L data integrity checker would have detected and fixed the problem.

o Fixed an issue with the home currency changer. The O/E G/L Batch was ignored.

Version 9.3.3.173 (9.3A SP3), July 4th, 2018

o Fixed an issue with customer number changer. One of the transaction file indexes was not updated.
   The A/R data integrity checker would have fixed the problem.

Version 9.3.3.172 (9.3A SP3), June 27th, 2018

o Added support for the following new releases:

   Adagio Receivables 9.3A (2018.06.22)
   Adagio Invoices 9.3A (2018.06.23)
   Rentals for Adagio 9.3A (2018.06.25)

o Added protection against installation into the SOFTRAK vs SOFTRAK\TOOLKIT folder

o Fixed an issue with the company profile option 'mark for data integrity check'.
   It wasn't working for G/L functions.

o Fixed an issue with the B/R bank code changer. There were some missed bank fields
   in the Reconciliation Header that could result in data integrity problems.

o Fixed an issue with missing OE 93A menu options.

o Fixed an issue with the A/P vendor code changer. Vendor codes were not changed in the file retrieved into BankRec.

o Fixed an issue with clearing qty on an OE standalone configuration. It didn't start due to a missing IC receipt file.

Version 9.3.2.170 (9.3A SP2), February 12th, 2018

o Added support for the following new release:
   Adagio BankRec 9.2A (2018.02.09)

o Fixed an issue with the 'Edit G/L Posted Transactions' function.
   There were potential problems changing prior year amounts.

Version 9.3.1.169 (9.3A SP1), January 15th, 2018

o Fixed an issue with the 'Edit G/L Posted Transactions' function.
   There was a potential problem with the retained earnings account
   when prior year changes were made.

Version 9.3.1.167 (9.3A SP1), December 28th, 2017

o Added a new function to change or combine user IDs.

o Added support for the following new releases:

   Adagio OrderEntry 9.3A (2017.12.04)
   Adagio SalesCQ 9.2B (2017.12.13)
   Adagio DocStore 9.3A (2017.12.15)

o Fixed an issue with the 'Edit G/L Posted Transactions' function.
   There was a problem with the fiscal period when yearend adjustments
   were edited.

o Fixed an issue with the vendor number changer. It could have created
   a file integrity error for Purchase Orders 9.2B or 9.3A. The error was
   repairable.

o Fixed an issue with the shipto changer. Adagio invoice batches were not changed.

o The install will retain the install path for future installations.

Version 9.3.1.161 (9.3A), August 21st, 2017

o Added support for the following new release:

   Adagio PurchaseOrders 9.3A (2017.08.21)

Version 9.3.1.160 (9.3A), July 6th, 2017

o Added support for the following new releases:

   Adagio Ledger 9.3A (2017.06.25)
   Adagio Payables 9.3A (2017.06.23)

o Added the following new functions:

   A/R and A/P Control Account Changer
   A/P and B/R Bank Code Changer

o Added support for ePrint pdfs stored in the SOFTPDF folder. PDF file names
   and metadata will be adjusted when you change or combine customers or vendors.

o Fixed an issue with the changing inventory items or locations. It could have
   created a data integrity error related to reorder information.

Version 9.2.64.152 (9.2B SP2), March 15th, 2017

o Added support for the following new releases:
   Rentals for Adagio 9.2B (2017.03.15)

Version 9.2.64.151 (9.2B SP2), February 27th, 2017

o Added support for the following new releases:
   Adagio Ledger 9.2B (2017.02.18)
   Adagio SalesCQ 9.2A (2017.02.21)

Version 9.2.63.150 (9.2B SP1), January 11th, 2017

o Fixed an issue with the recalculation of 1099 vendor stats and reverse checks.

Version 9.2.62.149 (9.2B SP1), January 9th, 2017

o Fixed an issue with copying older DLLs from the Softrak\System folder.

Version 9.2.61.148 (9.2B SP1), December 20th, 2016

o Added support for the following new release:
   Adagio Time&Billing 9.2A (2016.12.16)

o Fixed an issue with changing A/P 9.2B vendors.
  The observed error message was 'Internal Error: field [0] of
  [!P92BSCK] is not a string field. This error occurred when you changed
  a vendor with system checks on file.

o Improved the ability to merge customers with posted transactions.
   In some cases, documents have to be renamed to avoid collisions.
   That renaming strategy has been improved.

Version 9.2.60.147 (9.2B SP1), November 21st, 2016

o Added support for the following new releases:
   Adagio Receivables 9.2A (2016.10.13)
   Adagio Payables 9.2B (2016.11.07)
   OrderDesk for Adagio 9.2B (2016.09.20)
   Dakota POS 9.2A (2016.09.20)

o Fixed an issue with backing up the file EZSEMADS.

o Fixed an 'unable to load ADS DLL' error with multiple users.

o Fixed an issue with the recalculation of customer stats.

o Upgraded supporting DLLs

Version 9.2.59.145 (9.2B), August 25th, 2016

o Fixed an issue with combining jobs, phases or categories for
  Job Cost 8.1C or greater. The result was a file integrity error
  that could be fixed with a rebuild.

Version 9.2.58.144 (9.2B), August 8th, 2016

o Fixed an issue with Changers that need to process
  very large indexed files (> 2.1gb).

o Added a check for an upcoming ADS32.DLL. It's best to install the
  Toolkit where you install your other Adagio products.
  For example x:\SOFTRAK\TOOLKIT

o Upgraded supporting DLLs

Version 9.2.57.143 (9.2B), July 13th, 2016

o Fixed an issue with the 'Edit G/L Posted Transactions' function.
  There was a problem with inserting transactions.

Version 9.2.56.142 (9.2B), May 30th, 2016

o Added support for the following new releases:
   Adagio Ledger 9.2B (2016.05.16)
   Adagio FX 9.2B (2016.05.17)

o Fixed an install issue with running reports under a Terminal Server session
o Fixed an issue with the backup while files are in use

Version 9.2.55.141 (9.2A SP8), April 11th, 2016

o Added support for the following new release:
   Adagio PurchaseOrders 9.2B (2016.03.24)

o Fixed an issue with combining A/R 9.2A customer documents

o Fixed an issue with combining vendor documents where duplication could exist

o Fixed an issue with changing the short name of a P/O Sundry Vendor

o Fixed an issue with using a report group range to clear item quantity or delete items.
No items were found if the report group was less than 3 characters in length.

o Fixed an issue with the display of a minimized filter progress dialog.

o Upgraded supporting DLLs

Version 9.2.54.137 (9.2A SP7), January 5th, 2016

o Added support for the following new releases:
   Adagio DataCare 9.2A (2015.09.16)
   Adagio JobCost 9.2A (2015.12.03)
   Adagio OrderEntry 9.2A (2016.1.11)

o Upgraded supporting DLLs

o Fixed an issue with backing up data prior to a home currency change.

o Fixed an issue with combining G/L account codes. Reallocations were combined
   but the reallocate status on the target account was not set.

o Fixed the popup menu for the Edit G/L Posted Transaction function.

Version 9.2.53.135 (9.2A SP6), August 19th, 2015

o Fixed an issue with the AP 92A dictionary. It might impact
   the vendor, job cost or currency changer if there was system
   check data on file.

Version 9.2.52.134 (9.2A SP6), August 10th, 2015

o Added support for the following new release:
   Adagio OrderEntry 9.2A (2015.7.29)
o Upgraded the backup DLL and added multi-currency files

Version 9.2.51.133 (9.2A SP5), June 24th, 2015

o Fixed an issue with the customer smart finder

Version 9.2.50.132 (9.2A SP5), May 29th, 2015

o Added support for the following new releases:
   Adagio SalesAnalysis 9.2A (2015.05.27)

   National Accounts for Adagio 9.2A (2015.05.15)
   Rentals for Adagio 9.2A (2015.05.15)
   Exporter for Adagio 9.2A (2015.05.15)
   Remote Orders for Adagio 9.2A (2015.05.15)
   OrderDesk for Adagio 9.2A (2015.05.15)
   ePack for Adagio 9.2A (2015.05.15)

o Added ability to redesign customer and vendor codes from the
   name or numeric series.

o Added a 'Delete All' button to delete all pending changes.

o Enhanced the 'Active Users' dialog.

Version 9.2.49.131 (9.2A SP4), May 6th, 2015

o Added support for the following new releases:
   Adagio Invoices 9.2A (2015.04.28)
   Adagio Inventory 9.2A (2015.05.15)
o Fixed an issue with the Item Format Changer. After a format
   change, Adagio would display an error when the data
   was first opened. The problem was automatically corrected.

Version 9.2.48.130 (9.2A SP3), April 20th, 2015

o Added support for the following new releases:
   Adagio Payables 9.2A (2015.03.10)
   Adagio Receivables 9.2A (2015.04.10)
o Added ability to edit the short name when posting changes to
   customers or vendors.
o Fixed an issue with the 'Edit G/L Posted Transactions' function.
   There was a potential problem with posting changes to a
   balance sheet account in prior years.

Version 9.2.47.129 (9.2A SP2), February 27th, 2015

o Added support for the following new release:
   Adagio PurchaseOrders 9.2A (2015.02.17)

o Fixed an issue with combining reorder data for
  inventory items.
o Fixed an issue with changing customers or vendors and
  having that change consistently appear in G/L posted
  transactions subledger fields.
o Fixed an issue with DataCare and the file integrity check.

Version 9.2.46.128 (9.2A SP1), January 12th, 2015

o Added support for the following new release:
  Adagio BankRec 9.2A (2014.12.18)
o Fixed issues with the 'Edit G/L Posted Transactions' function.
  There were potential problems for a very large transaction file
  or delays between entering and posting your changes.

Version 9.2.45.127 (9.2A), December 3rd, 2014

o Added support for the following new releases:
  Adagio Ledger 9.2A (2014.11.20)
  Adagio MultiCurrency 9.2A (2014.11.21)
o Updated the toolbar images and product icon
o Improved the time required to post changes to
  G/L transactions

Version 9.1.44.126 (9.1C SP3), October 16th, 2014

o Fixed an issue with the customer smart finder

Version 9.1.43.125 (9.1C SP3), September 18th, 2014

o Added support for the following new release:
  Adagio Time&Billing 8.1D (2014.09.29)

o Disable grids during posting.
o Enhanced the way unsupported apps are reported.
o Fixed an issue with editing the customer transaction description 2.
  The maximum length should have been 40, not 30 under AR9.
o Vendor payee information is no longer combined.

Version 9.1.41.123 (9.1C SP2), August 12th, 2014

o Added support for the following new release:

  Adagio Receivables 9.1A (2014.07.23)

Version 9.1.40.122 (9.1C SP1), June 30th, 2014

o Added support for the following new releases:

  Adagio JobCost 8.1D (2014.06.23)
  Adagio FX 9.1A (2014.06.19)

o Fixed an issue with changing the currency for the P/O 8.1C G/L Transaction Batch file.

Version 9.1.39.121 (9.1C), April 1st, 2014

o Fixed an issue reading the Adagio Invoices 6.8B global file. An error appeared when
the data was opened or when customer changes were posted.

Version 9.1.38.120 (9.1C), March 27th, 2014

o Fixed a problem with the I/C dictionary that would have caused problems with
  an IC item change

o Fixed a problem with a change to a code, where only the case changed. For example

changing 'Dakota' to 'DAKOTA'. This was disallowed, but should have been permitted.

Version 9.1.37.119 (9.1C), March 24th, 2014

o Added the following new functions:

   I/C Price List Changer
   P/O Sundry Vendor Changer
   P/O Ship/BillTo Changer

o Added support for the following new releases:

   Adagio DataCare 9.1A (2014.02.19)
   Adagio PurchaseOrders 8.1D (2014.03.10)
   Adagio Inventory 8.1E (2014.03.30)

o Open and create dialogs are now sizeable
o Updated support DLLs

Version 9.1.36.117 (9.1B SP2), January 13th, 2014

o Fixed issues related to the P/O document format changer.
  In particular, error messages when auto-numbering was turned
  off, document default formats and optional indexing.

Version 9.1.35.116 (9.1B SP2), December 9th, 2013

o Updated support DLLs
o Added ability to archive open files
o Menu level security fixes
o Cosmetic changes

Version 9.1.34.114 (9.1B SP1), August 20th, 2013

o Fixed an error opening the smart finder under select conditions

Version 9.1.32.111 (9.1B), August 19th, 2013

o Added support for the following new releases:

   Adagio BankRec 8.1E (2013.08.11)
   Adagio Payables 8.1F (2013.08.26)

o Added a new function to change, combine or copy A/R territories.

o Added support for P/O Standalone (without Inventory Control) to
  change or format sundry items.

o Added consultant information to the About dialog using the same design
  as new Adagio product releases.

Version 9.1.31.110 (9.1A SP1), July 18th, 2013

o Added support for the following new release:

   Adagio OrderEntry 8.1F (2013.07.08)

Version 9.1.30.109 (9.1A), May 27th, 2013

o Added support for the following new releases:

   Adagio PurchaseOrders 8.1C (2013.05.17)
   Adagio Ledger 9.1A (2013.05.23)
   Adagio Receivables 9.1A (2013.06.06)

o Added the ability to move customer and vendor transactions
   from current to history and vice versa.

o Added next year's 1099 to the re-calculation of vendor stats.

o Fixed the currency change to Adagio SalesCQ.

o Fixed an issue with changing G/L accounts with FX data present.

Version 9.0.29.108 (9.0F SP2), January 9th, 2013

o Added support for the following beta release:

   Adagio PurchaseOrders 8.1C (2012.12.14)

Version 9.0.28.107 (9.0F SP1), November 21st, 2012

o Added support for the following new release:

   Adagio Payables 8.1E (2012.11.13)

Version 9.0.27.106 (9.0F), September 20th, 2012

o Added two new functions to edit customer and vendor posted transactions

o Improved backup performance

o Added support for the following new release:

   Adagio SalesCQ 8.1C (2012.09.17)

Version 9.0.26.105 (9.0E HF), June 7th, 2012

o Enhanced the workstation install to install the Crystal Report DLLs to the user profile Window's folder,
   if required. Also added a log of the last 10 workstation installations.

o Fixed a problem combining item notes under select conditions. Specifically,
   single segmented items with varying lengths.

Version 9.0.25.104 (9.0E), May 8th, 2012

o Added support for the following new release:

   Adagio JobCost 8.1C (2012.05.13)

Version 9.0.24.103 (9.0D HF2), March 31st, 2012

o Fixed a problem with merging G/L accounts.
   Some non-accounting fields were cleared. Specifically, the posting user,
   post date and post time.

Version 9.0.23.102 (9.0D HF), March 1st, 2012

o Fixed a problem with merging vendors.
   Some of the posted transaction G/L disbursements could have been
   lost in the process. The posted transactions were correctly merged.

Version 9.0.22.100 (9.0D), February 9th, 2012

o Added support for the following new releases:

   Adagio Inventory 8.1D (2012.01.26)

Adagio Time&Billing 8.1C

o Also verified to work with the following new releases:

   Adagio Payables 8.1D (2012.02.03)
   Adagio Ledger 9.0D (2012.02.07)

o Added a Salesperson changer for A/R, O/E and Q/I salespersons.

Version 9.0.20.98 (9.0C SP5), December 22nd, 2011

o Added support for the following new releases:

   Adagio Receivables 9.0C (2011.12.09)
   Adagio OrderEntry 8.1E (2011.12.15)
   Adagio Payables 8.1D (2011.12.31)

o Fixed a problem with calculating the average days to pay statistics
   for customers and vendors. The problem will be corrected by
   re-running the recalculate statistics function.

o Fixed a problem the A/R customer changer where changes were made
   to the Invoice/Credit Note Audit trail. Discovered by in-house testing.

o Fixed a problem the G/L batch changer where the next year batch
   header/detail data files do not exist. Discovered by in-house testing.

Version 9.0.19.97 (9.0C SP4), November 14th, 2011

o Added support for the following new releases:

   Adagio Invoices 9.0B (2011.11.02)
   Adagio BankRec 8.1D (2011.11.08)
   Adagio SalesAnalysis 9.0B (2011.11.14)
   Adagio ePrint 9.0A (2011.09.23)

Version 9.0.18.96 (9.0C SP3), August 11th, 2011

o Added support for the following new releases:

   Adagio Receivables 9.0B (2011.07.27)
   Adagio Payables 8.1C (2011.07.29)

Version 9.0.17.95 (9.0C SP2), July 25th, 2011

o Added support for the following new release:

   Adagio Ledger 9.0D (2011.06.29)

o Added a G/L Department changer.

Version 9.0.16.94 (9.0C SP1), May 20th, 2011

o Added support for the following new releases:

   Adagio BankRec 8.1C (2011.05.12)
   Adagio Payables 8.1C (110322 HotFix)

o Fixed the retention of id/password at login.

Version 9.0.15.93 (9.0C), April 26th, 2011

 o Fixed a problem with the menu security. Incorrect menu items were disabled.

Version 9.0.14.92 (9.0C), April 20th, 2011

  o Fixed a problem with the 'Edit G/L Posted Transactions' function.
    Editing an entry for period 12, changed it to a closing period. This was
    not a problem for any previous version.

Version 9.0.12.91 (9.0C), April 11th, 2011

  o Added support for the following new releases:

    Adagio MultiCurrency 8.1B (2011.03.11)
    Adagio DataCare 9.0A (2011.03.24)
    Adagio SalesAnalysis 9.0A (2011.03.23)
    Adagio Invoices 9.0A (2011.03.17)
    Purchase Orders For Adagio 8.1B (2011.03.25)

o Added ability to post multiple changes to G/L transactions.

o Added ability to edit posted G/L transactions from any prior year.

o Added ability to change next year's open G/L batches.

o Added a function to change, combine or copy P/O sundry items.

o Added a function to change the format of P/O documents, including
   purchase orders, receipts, returns, adjustments and requisitions.

Version 9.0.11.89 (9.0B SP4), November 17th, 2010

  o Added support for the following new releases:

    Adagio OrderEntry 8.1D (2010.11.05)
    Adagio Ledger 9.0C SP2 (2010.11.24)
    Adagio BoM 8.1D (2010.11.06)

  o Added support for field changes within filters.

  o Fixed a problem with the use of wildcards. Not all combinations
    were generated.

  o Fixed a problem with combining departments under one account.
    The problem was specific to G/L 9.0C and select data configurations.

o Fixed a problem with changing a customer, where cross-referencing was
   active. The source customer was written with a blank (invalid) control account,
   terms and billing cycle. The problem was correctable from within A/R.

o Fixed a problem with the re-calculation of customer statistics. Rerun this function
   to correct the problem.

Version 9.0.7.85 (9.0B SP3), September 27th, 2010

  o Added support for the following new releases:

    Adagio Receivables 9.0B (2010.09.10)
    Adagio GridView 9.0C (2010.10.01)

  o Added the Toolkit to the Adagio menu

Version 9.0.5.83 (9.0B SP2), August 6th, 2010

  o Added support for the following new releases:

    Adagio Inventory 8.1C (2010.07.16)
    Adagio Payables 8.1C (2010.08.10)

Version 9.0.4.82 (9.0B SP1), June 23rd, 2010

 o Added a new function to change a variety of field data in
   open G/L batches.

o Added support for the following new releases:

   Adagio Invoices 9.0A (2010.05.03)
   Adagio SalesCQ 8.1B (2010.05.31)
   Adagio BankRec 8.1B (2010.05.06)
   Adagio OrderEntry 8.1C (2010.05.07)
   Adagio Receivables 9.0A (2010.05.04)
   Adagio SalesAnalysis 8.1B (2010.05.05)
   Adagio Time&Billing 8.1B (2010.05.10)

o An option has been added to change stock items to non-stock
   item, when clearing item quantity.

Version 9.0.2.79 (9.0B), April 30th, 2010

 o Added support for the following new release:

   Adagio Ledger 9.0C (2010.04.05)

 o Added protection against combining two G/L accounts with
   different account types, currencies or multi-currency setting.
   This can lead to data integrity problems.

 o Added new print/preview options for windows size and magnification.

 o Added the ability to export to Excel from each grid.

 o Improved error reporting on all imports. You can print or view
   errors that could be due to a combination of records.

 o Improved the import/export to Excel, using current formats.

 o Improved the data integrity checker. You will be prompted to backup
   the data before a rebuild or after a clean check.

 o Fixed a problem with deleting inventory items. The items were not
   removed from I/C history. This error can be corrected using the
   I/C data integrity checker.

o Fixed a problem with importing inventory item changes. The previous version
  permitted mixed case item codes. Imported codes are converted to upper case
  or trimmed of leading zeroes to be consistent with Adagio.

Version 9.0.1.77 (9.0A), February 8th, 2010

 o Added support for the following new releases:

   Adagio Checks 8.1B (2009.12.29)
   Adagio FX 8.1C (2010.01.13)

o Fixed a problem with the G/L account code changer and GL90A or GL90B.
   Accounts in unposted G/L batches were overlooked.

Version 9.0.1.76 (9.0A), February 2nd, 2010

 o Updated the Toolkit DLL to recognize DataCare 8.1A. The previous warning
   could have been ignored, because the Toolkit doesn't change any data with
   DataCare.

Version 9.0.1.75 (9.0A), January 5th, 2010

o Updated ADS32.DLL to 1.12.54.2623 to fix an error with rebuilding files.

Version 9.0.1.74 (9.0A), January 1st, 2010

o Improved the detection on unsupported data

o Updated the ADS32.DLL to current version, 1.12.54.2619

o Fixed a problem with the import, where the AR and OE data was absent.
  An error message would appear about unable to open the O/E ShipTo
  data file.

o Fixed a problem with opening wildcard files that contain blank spaces
  in the middle of the wildcard. Ex: GL!NP- 9.DAT

Version 9.0.1.70 (9.0A), December 15th, 2009

o Added support for the following new release:

  Adagio Payables 8.1B (2009.11.30)

o Purchase a 2 year upgrade plan and receive a 3rd year for free.

Version 9.0.1.69 (9.0A), October 15th, 2009

o Fixed a compatibility issue with Order Entry 8.1C.
  The symptom would be a fixable data integrity error in
  the Sales Order Detail file, after a change to an item.

Version 9.0.1.68 (9.0A), October 1st, 2009

o Added the following new functions:

  I/C Category Changer
  I/C Location Changer
  Home Currency Changer
  ShipTo Changer
  Recalculate Customer Statistics
  Recalculate Vendor Statistics
  Edit G/L Posted Transactions

o Added support for the following new releases:

  Adagio Time & Billing 8.1B (2009.09.27)
  Adagio Inventory 8.1B (2009.07.14)

o Added an item range to the Unit Of Measure Changer

o Added last access information to the Open dialog.

o Redesigned the registration process. New registration
  codes are required for this version.

o Reorganized the menus by Adagio product.

o Improved the progress information and response.

o Redesigned the installation process.

Version 8.2.13.63 (8.1B SP3), September 10th, 2009

o Added a workstation install

o Improved the performance of the Item Format Changer.

o Fixed a problem with Item Format Changer. Under
  certain scenarios, the Sales Analysis item field was
  not updated to the new format. In particular, orphaned
  inventory items.

Version 8.2.11.61 (8.1B SP3), August 12th, 2009

 o Added support for the following new release:

   Adagio OrderEntry 8.1C (2009.07.31)

Version 8.2.10.60 (8.1B SP3), June 15th, 2009

 o Added support for the following new release:

   Adagio JobCost 8.1B (2009.06.09)

Version 8.2.9.59 (8.1B SP2), May 31st, 2009

 o Fixed an error was introduced on the previous build. An unopened file
   would prevent the export from proceeding.

Version 8.2.8.58 (8.1B SP2), May 5th, 2009

 o Added support for the following new releases:

   Adagio BankRec 8.1B (2009.05.14)
   Adagio Ledger 9.0B (2009.04.30)
   Adagio Purchase Orders 8.1A (2009.04.09)

 o Fixed a problem with the rebuild of a Sales Analysis transaction index.
   If discovered, the S/A data integrity checker would rebuild the error.
   There was no loss of data.

 o Added the backup file name to the progress dialog.

Version 8.2.7.57 (8.1B SP1), April 7th, 2009

 o Added support for the following new releases:

   Adagio Receivables 9.0A (2009.03.31)
   Adagio Invoices 8.1B (2009.03.16)
   Adagio SalesAnalysis 8.1B (2009.02.24)
   Adagio Lanpak 9.0B

 o Fixed a problem with the truncation of GL 9.0A description fields. The
   acct/dept description has been increased to 40 characters. All description
   fields have been expanded to support this 9.0 standard length. Conversion of
   existing Toolkit data files will be required.

 o Improved the post progress response. The progress bar should immediately appear
   when you post changes.

 o Improved the response to a backup failure prior to posting changes. The user will
   be informed and the post will be aborted.

 o Improved the validation of pending changes that were imported or added by the user.

 o Added support for the Adagio menu from within the Toolkit.

Version 8.2.6.56, March 11th, 2009

 o Fixed a problem at startup, accessing ACCPAC Plus J/C data.

 o Fixed a problem combining certain I/C items. For example, item ' ABC' into 'ABC'.
   For multi-segmented items, leading blanks are acceptable. In this instance, the

process failed to combine the I/C historical transactions.

o Fixed a problem with the reports, where the default number format is not '#,###.##'.

Version 8.2.4.54, February 22nd, 2009

o Added a 'last access date' to Active Data grid. The dates can be useful to determine
  when a particular module was last run.

o Added support for job alerts, soon to be supported by Adagio JobCost.

o Corrected a problem with merging customers or vendors where they share the same
  document numbers. Duplicate documents are not permitted, so the Toolkit will
  rename them. For example, Invoice 1000 becomes 1000A or 1000B. The detection of
  duplicates has been improved.

Version 8.2.3.53, January 18th, 2009

o Corrected a few missing field references in G/L sub-ledgers and external batch files.

Version 8.2.2.52 (8.1B), January 2nd, 2009

o Added the Job Cost Changer. You can change, combine or copy a job, phase or category.

o Added the I/C Unit of Measure Changer. Use the 'load' function to view all entered units.

o Added the I/C Recalculate Sales History function. You can edit the
  fiscal calendar stored in I/C and then recalculate the item sales history
  statistics. The function relies on I/C historical transactions.

o Added new options to the company profile.

o Added support for wildcard entry. For example, changing customers
  'A?????' to 'B?????'. The result will be multiple records that match
  the wildcard entry. The '?' is used to indicate any character.

o Added support for an automated post from one or more functions. Functions can
  be specified from the command line. Please refer to the manual for details.

o Added an automatic export of posted changes to a CSV file.

o Fixed a problem with the G/L Account Changer. If you changed the department to
  one that previously did not exist, the new department would have been added
  with a blank description using the company profile retained earnings acct/dept.

o Changed the completion message when you post changes. The message will tell you
  how many changes were made, as opposed to the number of instances.

o Fixed the text on the import/export job cost dialog. The acceptable values for
  the 'Code Type' field are 1=Job, 2=Archived Job, 3=Phase, 4=Category.

Version 8.1.17.51, December 29, 2008

o Fixed a problem when combining G/L accounts. Budget information from the merged
  account could have been lost.

Version 8.1.16.50, November 3, 2008

o Improved the validation of imported pending changes.

o Fixed an error message while posting changes to inventory items. The error message
  was related to an invalid category.

Version 8.1.16.49, October 28, 2008

o Fixed a problem where a Crystal Reports configuration file was being updated from the

Toolkit install directory. It may have caused problems with a few Adagio reports.
For example, the Adagio Invoices, Batch Listing Report.

o Added a check for special prices during the data integrity check. This check will
only appear if you have order entry. The function will repair any special prices
affected by a previous build.

Version 8.1.14.47, October 15, 2008

o Fixed a problem with updating items that are also O/E special prices. The
item was changed, but so was the category field. With special price items,
the category should remain blank. Re-editing the special price would fix
the problem.

Version 8.1.13.46, September 25, 2008

o Added a missing DLL (SSIBDM32) to the installation. The DLL was required
when the Adagio Lanpak registration was incomplete. The workaround was to
manually copy the file from \SOFTRAK\SYSTEM to \SOFTRAK\TOOLKIT\SYSTEM or
complete the Lanpak registration.

Version 8.1.13.45, August 25, 2008

o Added a check for items on quotes, purchase orders and sales orders
that may have been overlooked by the Delete Inventory function.

o The inventory item extension record was not deleted by the Delete
Inventory function. The problem was correctable by the IC data
integrity checker.

o Fixed a problem changing inventory items with leading blank characters.
The pending change record had the blank character removed.

Version 8.1.11.42, July 28, 2008

o Fixed a problem with accessing the HTML help from a network location.

o Fixed a problem with changing G/L accounts that are in subledger batches.

Version 8.1.10.41, July 23, 2008

o Added configuration information to the registration form.

o Fixed a problem with validating pending change records. The
user should not be able to add more than one change per target
code. For example, item A to item B, item C to item B. You
can only do this scenario with multiple combine records.

o Fixed a problem with the I/C item import. The description length
should have been 40, instead of 30.

o Fixed a problem with the I/C item number changer. Under certain
scenarios, the item count in the category file was not correct. The
I/C DIC can repair this type of problem.

Version 8.1.9.40, July 9, 2008

o Adjusted form sizes to consider XP desktop themes.

Version 8.1.8.39, June 29, 2008

o Fixed a problem deleting cross-referenced G/L 9 accounts.

o Improved the performance of the I/C Item format change.
There are scenarios where it's not required to change all item fields.
For example, extending a multi-segmented item.

Version 8.1.7.37, June 23, 2008

 o Fixed a problem with I/C Item format change. The S/A global
   file was not updated with the new item format.

 o Adagio Lanpak file is copied into the Toolkit System directory,
   if missing.

 o A prompt for registration has been added to the startup.

 o The registration fields will be defaulted from the company
   profile fields.

 o Help text was added to the import/export forms to explain
   the acceptable action values.

Version 8.1.5.34, June 17, 2008

 o Delete Inventory function will now delete master BOM items, if
   they qualify.

Version 8.1.5.33, May 20, 2008

 o Located Help files under Documents and Settings folder.

 o Fixed a problem with the GL Account changer in changing
   IDT files. For example, AP bank accounts.

 o Fixed a problem under GL9 in changing the
   acct description. The GL8 description was not changed.

 o Fixed a problem with the creation of new G/L departments
   or blank departments being added to the list.

Version 8.1.5.30, May 15, 2008

 o Added HTML Help.
 o Added Toolkit User's Guide.
 o Fixed a problem with G/L 9.0 Account Changer. The
   net changes file was left open during the post which
